

# MMM System + Technology GmbH

---

MMM System + Technology GmbH is located in Dusseldorf.

"Triple M" stands for Moderation, Monitoring and Mediation. These areas of expertise reflect our philosophy to systematize technology in the sustainable interest of the people.

**Moderation** involves the optimization of intercultural communication between the parties in international project management.

**Monitoring** structures within our company safeguard the interest of the parties by using our own early warning system. This applies as prevention for regulatory compliance. Also part of the package is our Monitoring of the project and product development to successful completion.

**Mediation** means harmonization of all conflicting interests. Our crisis management ensures harmony between man and law.

In project and product management we offer a unique combination of industrial design and communication, for which we coined the name "Soft Product".
